STORAGE

Product Information

Capital

Capital Shelving is a high quality, easily adjustable storage system that will suit all your filing storage requirements. Shelves and filing accessories are adjustable on a 25mm pitch allowing maximum usage within the bay. Storage space within any environment is an expensive commodity that you cannot afford to waste. You need a cost-effective storage system to meet your current storage demands and future growth. Capital shelving presents a wide range of standard components that can be combined to create a tailor made solution to address the specific requirements of your department.

Here are just some of the available options.

- Shelves for boxed item storage.
- Duplex shelves for conventional storage and suspended filing.
- Lateral filing cradles for cost effective file storage.
- Pull out shelves for a space saving writing surface.
- Telescopic filing cradles for low level accessibility.
- Tambour doors for security and improved general appearance.

Accessories can easily be retrofitted and bays can be extended to increase capacity as your requirement grows.

Capital shelving is specifically designed to be used in the filing and document storage environment. Mounting Capital onto a mobile base gives you a solution that will maximise the available floor area or compact the storage system into a restricted space. Compared to static shelving, Capital mobile shelving can increase capacity by up to 100% or alternatively save up to 45% of the floor space occupied by the equivalent quantity of static shelving bays.

As an ISO 9001 accredited company and a founder member of the Storage Equipment Manufacturers Association (S.E.M.A.) **Metalrax Storage** promote and adhere to the design standards set out in the Association's Interim Codes of Practice.
