Labelling and Identification

General Information

The need for a quality and well thought out labelling and identification system is often overlooked but getting this right can transform your facility in to an efficient, smoother and cost effective operation.

A full range of identification products are available in a variety of fixings and materials to suit your specific needs.

Self-adhesive Labels

Available as letters or numbers they ensure high visibility for easy identification. Simple to apply they can be quickly removed leaving no residue. Suitable for the labelling of shelves and for use in the office e.g. labelling files etc.

Self Adhesive Label Holders

The self-adhesive backing on the label holder offers a long term fixing option in environments where the label inserts need to be changed frequently. Label holders can be supplied in standard pre-cut sizes or special sizes on request. White card inserts are supplied plain for your own labelling or can be pre printed with artefact information, locations or bar codes.

Magnetic Label Holders

Magnetic label holders are ideal for applications where regular changes are required. They are easier and quicker to move than adhesive backed holders. Label holders can be supplied in standard pre-cut sizes or special sizes on request. White card inserts are supplied plain for your own labelling or can be pre printed with artefact information, locations or bar codes.

Magnetic Easy Wipe Strip

The magnetic easy wipe strip provides a fast and cost effective updating system for identification. Supplied in a roll, each strip can be easily cut to size to suit your requirements. The strips allow for easy updates as you can write on and wipe off with a damp cloth.
